Editorial Comment: First, let me offer my apology for the poor clarity of some of the pins in this Automobile License Plates set. Since I used the same photographic process for these pins as for all the other pins in this issue, the results of our efforts here can be attributed to the use of the Black Nickel process by the pin maker. The Black Nickel tends to dull and darken the finish on the pin. When dark colors are used, particularly dark blue, the results are obvious.

Another comment is about the number of pins in the set. The States of Florida (Ann Zinser), Minnesota (Phil Baumann), New Mexico (Lynette Balding), and Wisconsin (Elwyn Beane) were not provided for this issue and should be available for the next issue. It should be noted that this very large set was in process before the Guidelines for this series were developed. We continue to urge all participants to keep the number of pins in the sets, if possible, to a maximum of 12. Your fellow pin traders will greatly appreciate your cooperation in this matter.
